Set your plans and prices

YOUR GYM. SIMPLIFIED.

gymos.africa

What's in this guide

Part One is your side of GymOS. Part Two is the front desk, so you can set it up and teach it.

1 What GymOS does

The two things every member pays for, and who does what

2 Your first time signing in

Your username and picking your password

3 Signing in each day

And what to do if it won't let you in

4 Getting the software

Downloading the desk app from the web, and GymOS on your phone

5 Getting to know your screen

Your seven menu items

6 The Dashboard

Five numbers and two graphs

7 Members

Your whole list, and how to filter it

8 Attendance

Who came in, and who checked them in

9 Finances

What came in, and who took it

10 Expiring soon

The people to ring this week

11 Your team

Adding staff, resetting passwords, suspending an account

12 Settings

Your plans, prices and extra questions

13 Downloads

The app and the guides

14 Your subscription

Free trials, and what happens if it runs out

15 When the internet is down

How the desk keeps working

16 Part Two — The front desk

Everything your receptionists see and do

17 Setting up from scratch

The order to do things on day one

18 If something looks wrong

Every message, explained

19 Your routine

Daily, weekly and monthly checks

CHAPTER 1

What GymOS does

GymOS runs the day-to-day of your gym: who is a member, what they paid, whether they may come in, and who actually turned up. You decide how it's set up. Your desk staff run it.

■ Every member pays for two things

This is the idea everything else is built on.

ITEM	WHAT IT IS
Membership	The right to belong to the gym. Everybody must have one — nobody can be signed up without it. Membership always lasts a year .
Equipment	The right to use the machines. Optional, priced separately, and you choose how long it lasts — a day, a week, a month or a year.

The two are counted separately, and your desk sees both at once with a plain answer: let them in, or don't. That's what lets you sell a yearly membership at one price and daily equipment access at another, which is how most gyms actually take money.

■ Who does what

WHO	CAN DO
You	Set the plans and prices, add extra sign-up questions, create staff accounts and pause them, and see every member, every payment and every visit — including who recorded it.
Your receptionists	Sign members up, check them in, take payments, fix member details. They only see the money they personally took.
Your provider	Sets up your gym and your owner account, chooses your gym's name, member code and currency, and looks after your subscription.

■ What you can't do, on purpose

- **Take a payment or check somebody in.** Those are desk jobs. On your side you can see everything and change nothing.
- **Change or delete a payment or a visit.** Nobody can — not your staff, not you, not your provider.
- **Change your gym's name, member code or currency.** Your provider sets those. The member code in particular is permanent, because it's printed into every member number you've ever issued.

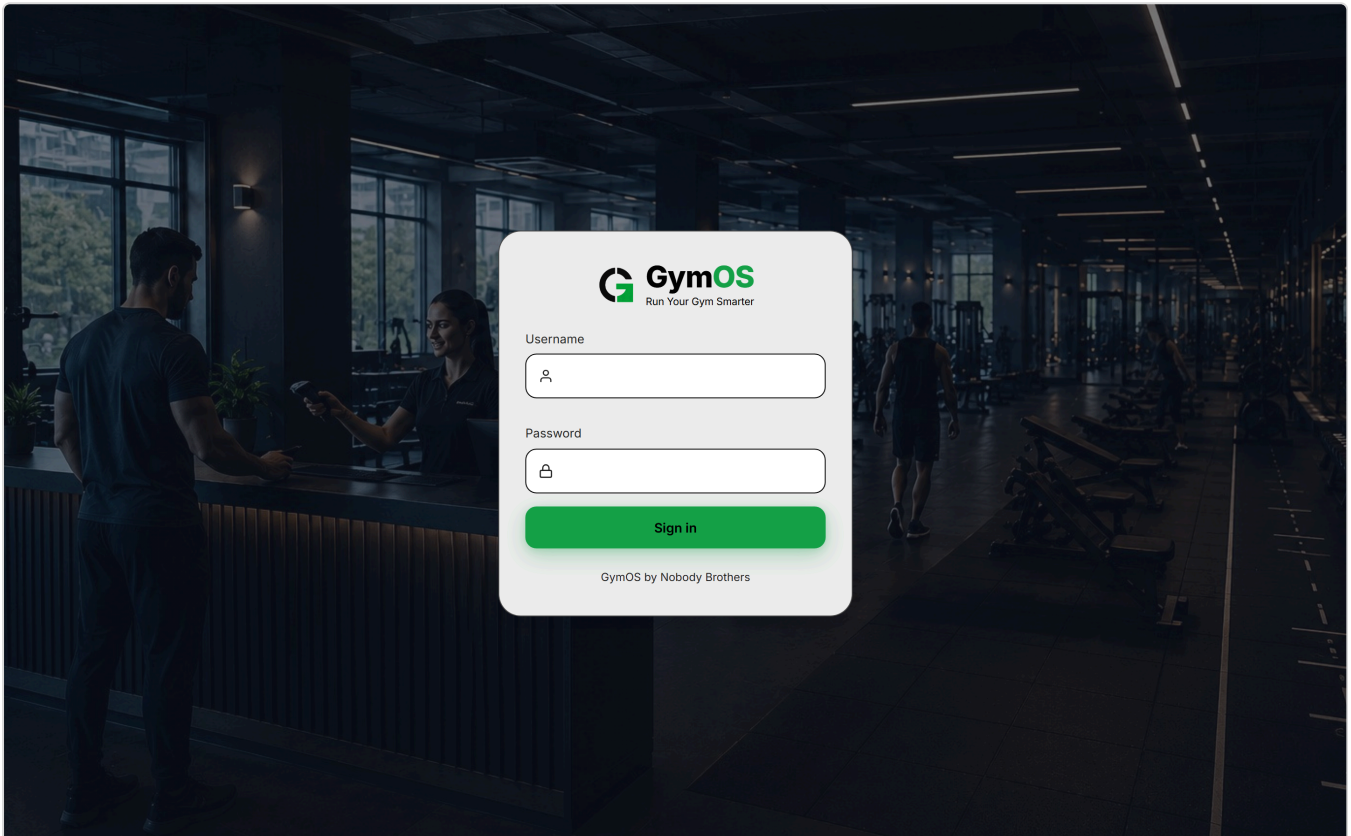

WHY YOU CAN'T EDIT THE HISTORY

If yesterday's takings could be changed, they would prove nothing. Because nobody can alter a recorded payment, your Finances page is real evidence of what came in. The same goes for attendance.

CHAPTER 2

Your first time signing in

There's no sign-up form anywhere in GymOS. Your provider creates your account and hands you the details.

The sign-in screen. The same one your staff use — what you can see afterwards depends on your account, not on this screen.

■ What you're given

ITEM	DETAIL
A username	Your gym's short code, a dash, then a name — like <code>sbg-owner</code> . All small letters. It is not an email address.
A starter password	Made up by the system and shown to your provider once. Write it down.
Your gym's code	Three or four letters, like <code>SBG</code> . Every member number starts with it (<code>SBG-0001</code>), and so does every staff username.

■ Step by step

- 1 Go to **gymos.africa** in a browser and open the sign-in page.

- 2 Type your username and the starter password, then press **Sign in**.
- 3 A screen asks you to pick your own password. This only happens once and can't be skipped.
- 4 Type a new password, then the same one again. At least **6 characters**.
- 5 Press **Set password**. You land on your Dashboard.

THERE IS NO PASSWORD RESET

GymOS never sends email — no reset links, no codes. If you lose your password, your provider has to make you a new account. Keep it somewhere safe.

DO THIS FIRST, ON A COMPUTER

Sign in on the web before anything else. From there you can download the desk app (Chapter 4), and you'll want your plans set up (Chapter 12) before your staff try to sign anybody up.

CHAPTER 3

CHECK WHAT YOU TYPED

Every password box has a small eye on the right. Press it to see what you have typed — useful on a phone, where it is easy to hit the wrong key and impossible to tell. Press it again to hide it.

Signing in each day

Username, password, straight to your Dashboard.

■ Where the sign-in page is

HOW YOU OPENED IT	WHAT YOU SEE FIRST
A web browser	Go to gymos.africa and use the Sign in link.
The installed desk app	The sign-in screen straight away.
The icon on your phone	The sign-in screen straight away.

■ If it won't let you in

MESSAGE	WHAT TO DO
Incorrect username or password.	Check Caps Lock, your gym's code and the dash.
Too many attempts. Wait a moment and try again.	Too many wrong tries. Wait a few minutes.
Can't reach the server...	No internet. In a browser you have to wait for it.
This account has been suspended...	Your account has been paused. Contact your provider.
No account is set up for [username].	The password worked but there's no account attached. Contact your provider.

IT SIGNS YOU OUT ON ITS OWN

Everybody, everywhere: after **6 hours** with nobody touching it, GymOS signs you out. That is a full shift, so it should not interrupt anyone mid-desk — but a screen left signed in overnight will not still be signed in in the morning.

Closing the app does not sign anyone out, on any device. Only those 6 hours untouched do. When somebody hands the desk over to somebody else, that is what the sign-out button is for — do not wait for the timer.

CHAPTER 4

Getting the software

The desk app for your front desk, and GymOS on your phone for you. You can get both yourself — sign in on the web and take what you need.

■ Which one goes where

VERSION	WHO USES IT	WHY
The desk app	Your front desk	It keeps working when the internet is down. Your desk can't stop working because the connection did.
A web browser	You	Nothing to install, always up to date, works on any computer.
Your phone	You	Check today's numbers from anywhere.

■ Downloading the desk app while signed in on the web

This is what the Downloads page is for. You don't need your provider there to set up a new computer — sign in on the web, take the app, and go.

 **GymOS**

Downloads

The desktop app and your guide, ready whenever you need them.

GymOS desktop app

Download

Owner's guide

Download

Downloads. The desk app is the first item, your guide beneath it. Each one gets a green **Download** button, with its version, file size and date, once your provider has published it — until then it reads *Not available yet*, as it does here.

- 1 On the computer you want to set up, open a web browser and go to **gymos.africa**.
- 2 Sign in with your owner username and password.
- 3 In the menu on the left, click **Downloads** — the arrow pointing down.
- 4 Find **GymOS desktop app** at the top of the list.
- 5 Press the green **Download** button beside it. It is a big file — around 120 MB — so give it a minute and don't close the tab while it's going.
- 6 When it finishes, open the downloaded file and run it.
- 7 Click through the installer. It puts a **GymOS icon on the desktop** and one in the Start menu.
- 8 Open GymOS from that new icon. The sign-in screen comes up straight away.
- 9 Sign in with the same username and password you use on the web.
- 10 The **first** sign-in on a new computer takes longer than usual while it copies your members and history onto the machine. Let it finish.

CAN'T FIND THE DOWNLOAD?

The desk app only appears when you're in a **web browser**. Inside the installed app itself it's hidden — there's no point downloading the installer from the thing it already installed. Your guide is still listed there.

■ Setting up each desk computer

- 1 Install the app yourself using the steps above — the installer is offered on owner accounts only, so your receptionists can't do this themselves.
- 2 Get **each receptionist** to sign in on that computer at least once *while the internet is working*.
- 3 That first proper sign-in is what lets them sign in later without internet. It's per person and per computer — your sign-in doesn't cover theirs.
- 4 After that it works for **14 days** from each person's last proper sign-in there, and the clock restarts every time they sign in with internet.

DO THIS BEFORE YOU NEED IT

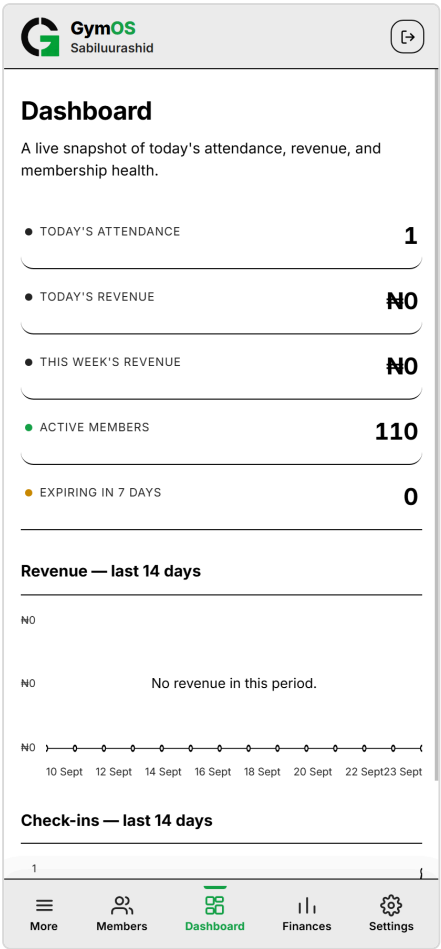

Don't find out on the morning of an outage that your new receptionist has never signed in properly on the desk computer. Make that first sign-in part of hiring somebody.

■ Putting GymOS on your phone

There is no app store to search. You add it straight from the browser.

PHONE	HOW
Android	Open gymos.africa , tap the : menu, then Install app or Add to Home screen , and confirm.
iPhone	Open gymos.africa in Safari, tap Share , scroll to Add to Home Screen , then Add .

A GymOS icon appears on your home screen and opens full-screen, with no browser bar. It goes straight to the sign-in screen.

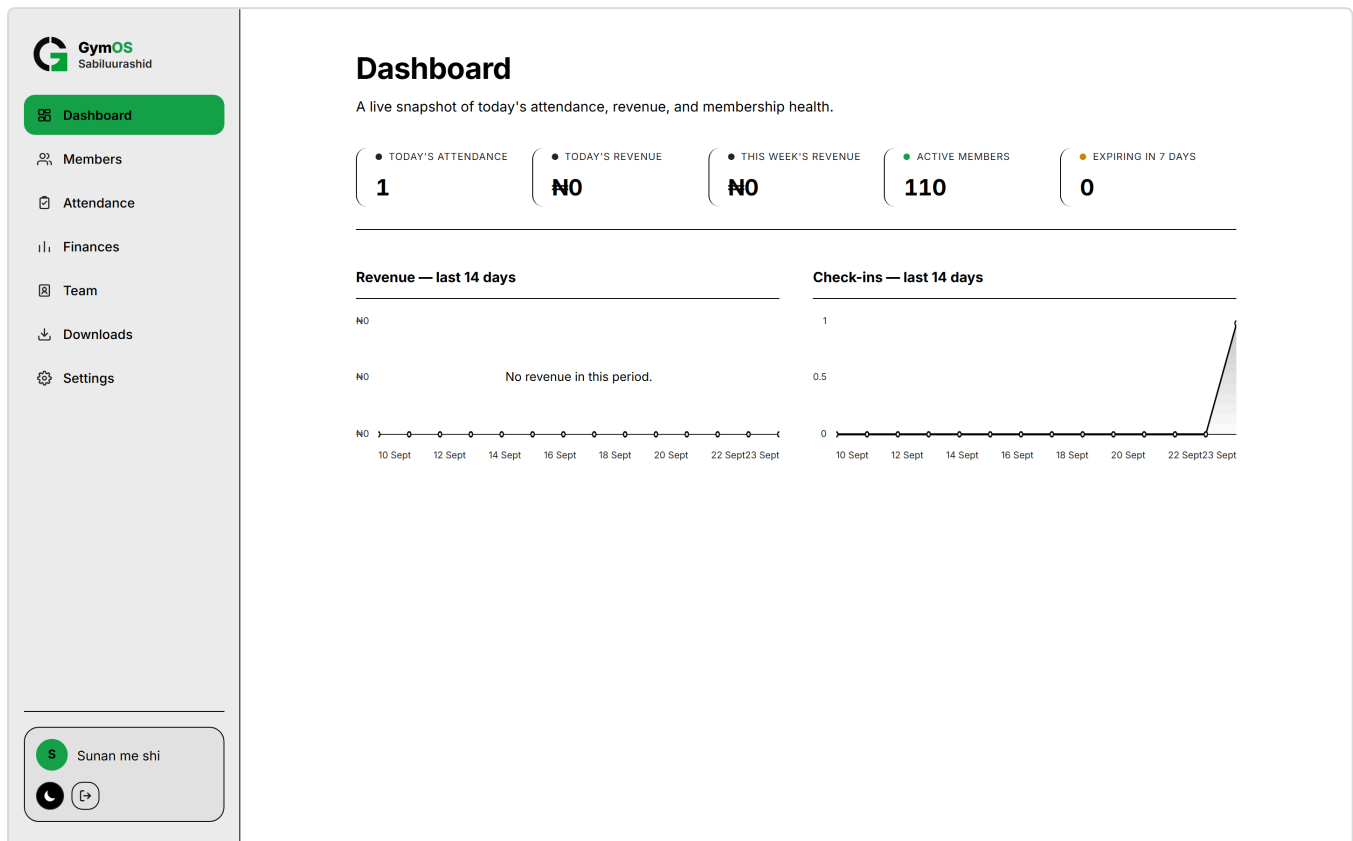

On your phone GymOS opens straight to the sign-in screen with no browser bar. Chapter 5 shows what the phone layout looks like.

CHAPTER 5

Getting to know your screen

Seven things down the left. No hidden menus.

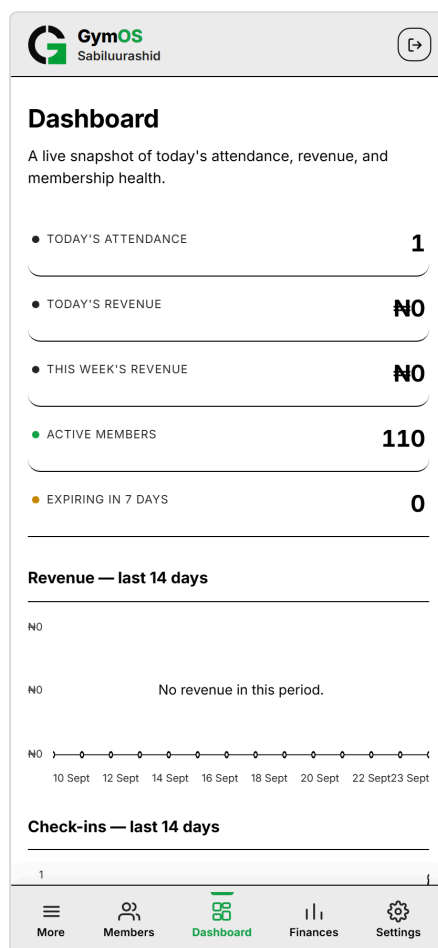

Your Dashboard. The menu is down the left, your gym's name sits under the GymOS logo, and your own name is at the bottom with the light/dark button and sign-out.

MENU ITEM	THE QUESTION IT ANSWERS
Dashboard	How is the gym doing right now? This is where you land.
Members	Who's on the books, and are they paid up?
Attendance	Who came in, when, and who checked them in?
Finances	What money came in, over what period, and who took it?
Team	Who works the desk, and what have they been doing?
Downloads	The app and the guides.
Settings	Plans, prices, extra questions, colours, password.

One page isn't in the menu: **Expiring soon**. You get there by clicking the *Expiring in 7 days* box on the Dashboard. It's a report you're sent to, not a place you go.

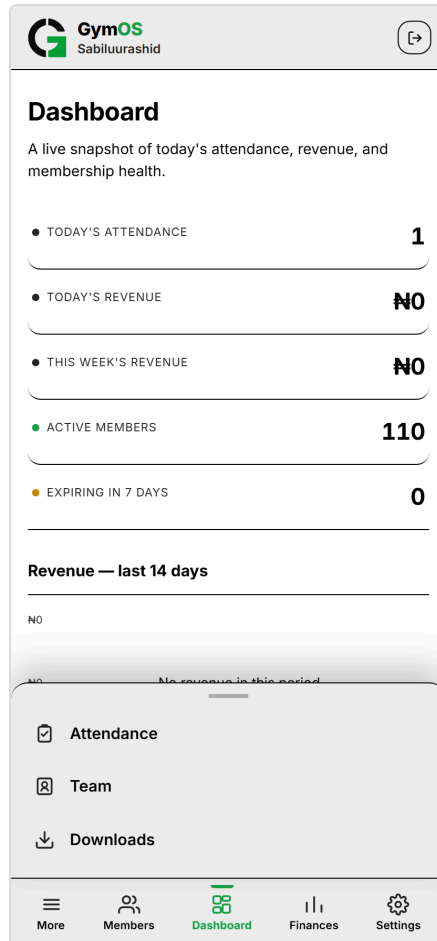

■ On a phone

A phone can't show seven or eight menu items without shrinking every label to a sliver, so the bar holds five: **More** on the far left, then **Members**, **Dashboard** and **Finances**, with **Settings** pinned on the far right. Dashboard sits in the middle because it's the page GymOS opens on and the one you'll come back to most — right under your thumb.

■ **Your Dashboard on a phone.** Five buttons along the bottom, with Dashboard in the middle.

Everything else — **Attendance**, **Team**, **Downloads** and **All branches** — is one tap away behind **More**.

Tap **More** and the rest slides up. Tap any of them to go there, or tap outside to close it. When you're on one of these pages, **More** lights up green so you can still see where you are.

IF YOU HAVE MORE THAN ONE BRANCH

A drop-down appears near the top of the menu listing your branches, and an extra menu item called **All branches**. Picking a branch changes *everything* — Dashboard, Members, Attendance, Finances, Team and Settings all then describe that branch. Glance at the gym name under the logo before you read a number.

CHAPTER 6

The Dashboard

Five numbers and two graphs, meant to be read in about ten seconds. Every number is a link to the page behind it.

■ The five numbers

BOX	WHAT IT COUNTS	CLICK IT FOR
Today's attendance	People checked in since midnight.	Attendance
Today's revenue	All money taken since midnight.	Finances
This week's revenue	From Monday morning to now.	Finances
Active members	How many people are on your books.	Members
Expiring in 7 days	Memberships running out within a week. It changes colour when it's above zero.	Expiring soon

READ "ACTIVE MEMBERS" CAREFULLY

It counts people on the list, not people who are currently paid up. To see who is really paid up, open **Members** and use the *Active Membership* filter. The gap between those two numbers is how many have lapsed — and it's worth watching.

■ The two graphs

Underneath, two graphs covering the **last 14 days**: what you took each day, and how many people came in each day. Fourteen days is two full weeks, so a Saturday sits next to a Saturday and you're comparing like with like.

■ What to look for

WHAT YOU SEE	WHAT IT USUALLY MEANS
People still coming, money falling	They're training on plans already paid for. Check Expiring soon — a dip in money often shows up there a week early.
Money steady, people not coming	They're paying but not turning up. Those are next year's renewals at risk.
A completely empty day in the middle	Check whether the desk was offline and hasn't sent its work up yet. See Chapter 15.
"Expiring in 7 days" climbing	A wave of renewals is coming. Click it and work the list before the week is out.

CHAPTER 7

Members

14	SBG-0065	Bola Eze	07015597956	Active

Your member list. Everyone in name order, with a green or red label showing whether their membership is good. The two buttons top right are the filter and the search.

The filter

FILTER	SHOWS
All	Everybody. This is the normal view.
Active Membership	Only people who are currently paid up. This is your real paying base.
Expired Membership	Everyone who has lapsed — your win-back list.
Expiring Soon	Still paid up, but running out within 30 days . Note this is a wider net than the Dashboard's 7-day box.

■ The search

The magnifying glass opens a search box, and it looks at more than the columns you can see. It searches name, member number, phone, email, address, emergency contact — *and the answers to any extra questions you added to the sign-up form.*

USE IT AS A QUICK REPORT

If you added a question like "How did you hear about us?", searching for `instagram` pulls up everybody who answered that. Combine it with the *Active Membership* filter and you have a rough idea of which channel brings paying members, with no reporting tool involved.

■ One member's page

Click any row to open it. You see everything and change nothing — there are no payment buttons on your side.

A member's page, your view. Their membership and equipment standing, their details, and at the bottom two tabs for everything they've paid and every visit they've made. No buttons — those belong to the desk.

Those two tabs settle most member arguments on the spot: what they paid and when, and whether they were actually here.

CHAPTER 8

Attendance

Every check-in your gym has ever recorded, by date, searchable by member — and if you open a row, who checked them in.

Attendance

Every check-in, filterable by date range and searchable by member.

Check-ins

#	MEMBER NO.	NAME	TIME
▶ 1	SBG-0003	Aisha Abiodun	23 Sept 2026, 06:52

Attendance. Pick a date range with the filter button, or search for one person. Click the little arrow on a row to see which receptionist recorded it.

■ Date ranges

RANGE	COVERS
Today	Midnight until now. The normal view.
This week	Monday until now.
This month	The 1st until now.
Custom	Shows From and To date pickers. Fill in both. The <i>To</i> date is included in full.

■ Things worth checking here

QUESTION	HOW
Which hours are busiest?	Set Today or This week and read down the times.
Is this member still coming?	Set This month and search their name.
Did the desk record anything on that day?	Custom , with the same date in both boxes.
Is a particular shift checking people in at all?	Open a few rows during those hours and look at the names.

A member appears at most **once a day** — the desk can only check somebody in once per day.

IF IT'S EMPTY AND IT SHOULDN'T BE

Either the desk isn't checking people in, or a desk computer hasn't sent its work up yet. Chapter 15 covers the second one.

CHAPTER 9

Finances

Everything about money on one page. Pick a period, read the total, then look at the payments behind it.

CASH AND TRANSFERS, COUNTED APART

Every payment now records how it arrived. The **Paid by** column says Cash or Transfer, so your cash total should match what is physically in the drawer and the transfers should match your bank — instead of one number that reconciles against neither.

 **GymOS**

S Sunan me shi

Finances

Revenue collected, by range — no separate reports page to dig through.

Revenue summary

Total: **NO** across 0 payment(s).

Transactions

No payments in this range.

Finances. The total and the number of payments are at the top; every payment is listed underneath. Open a row to see which receptionist took it.

■ Periods

PERIOD	COVERS
Daily	Midnight until now.
Weekly	Monday until now.
Monthly	The 1st until now.
All time	Everything this gym has ever taken.
Custom	Any two dates — use this for a finished month or a promotion week.

The summary reads something like *Total: ~~#~~450,000 across 63 payment(s)*. The count matters as much as the total — 63 small payments tell a different story from 6 big ones.

THESE FIGURES NEVER CHANGE

Each payment remembers the amount charged *at the time*. If you raise a price tomorrow, not one figure in this history moves. Last month's total will read the same in a year.

■ Checking a shift

- 1 Set the period to **Daily**.
- 2 Note the total and the number of payments.
- 3 Open rows to see which receptionist took each one — that's the figure to compare against their cash.
- 4 Your receptionists see the same shift on their own Finances page, showing only their own takings. You're both looking at the same numbers.

IF A PAYMENT SEEMS MISSING

On a desk computer, a payment that hasn't been sent up yet is safe on that machine but invisible to you. Before assuming it wasn't taken, ask the desk to check the number on their send button. See Chapter 15.

CHAPTER 10

Expiring soon

The list of people to ring this week. The most valuable page in GymOS, and the easiest to forget.

There's no menu item for it. You get there by clicking the **Expiring in 7 days** box on your Dashboard.

The screenshot shows the GymOS dashboard interface. On the left is a sidebar menu with the following items: Dashboard, Members, Attendance, Finances, Team, Downloads, and Settings. The main content area is titled 'Expiring soon (7 days)' and contains the text 'Nothing expiring in the next week.' At the bottom of the sidebar, there is a user profile section for 'Sunan me shi' with a green profile picture and a clock icon.

Expiring soon. Everything running out in the next 7 days — memberships and equipment together, soonest first. Each name is a link to that member's page.

PEOPLE WHO HAVE ALREADY LAPSED AREN'T HERE

This is a list of people you can still catch *before* they run out. For those who already have, use **Members** → **Expired Membership**.

■ Two lists, two jobs

WHERE	WINDOW	USE IT FOR
This page	7 days	This week's phone calls. Urgent.
Members → Expiring Soon	30 days	Planning the month ahead. Not urgent.

■ How to work it

- 1 Open it every Monday.
- 2 Click each name to see their phone number and what they've paid before.
- 3 Ring or message them. Say the actual date they run out — it works better than "soon".
- 4 Tell your desk who's coming in to renew, so it's expected.
- 5 Check on Friday that the list has got shorter.

"*Nothing expiring in the next week*" is good news — though if it stays that way while your member count grows, check that memberships are actually being recorded at sign-up.

CHAPTER 11

Your team

Making accounts for your receptionists, seeing what each one has done, and switching an account off when somebody leaves.

Dashboard

Members

Attendance

Finances

Team

Team

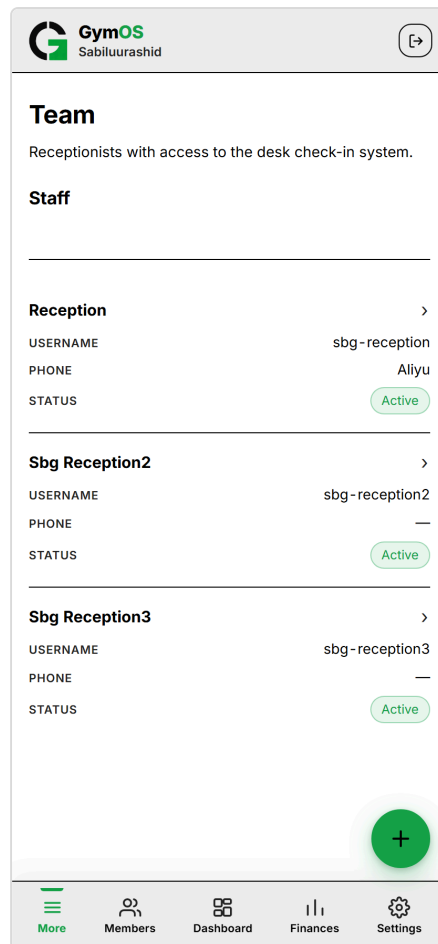

Receptionists with access to the desk check-in system.

Staff

Add a receptionist

#	NAME	USERNAME	PHONE	STATUS
1	Reception	sbg-reception	Aliyu	Active
2	Sbg Reception2	sbg-reception2	—	Active
3	Sbg Reception3	sbg-reception3	—	Active

Team. Every receptionist, their username, and whether their account is switched on. The green button adds a new one. Click a row to open that person.

Team on a phone. Each person becomes a card instead of a table row, and the green round + in the corner is how you add someone. Every page that creates something works this way on a phone.

■ Adding a receptionist

- 1 Press **Add a receptionist**.
- 2 **Name** — their real name. This is what shows against every payment and check-in they record, so use the name you'd actually use when asking them about one.
- 3 **Username** — your gym's code and dash are already there; you type only the bit after it. Letters and numbers only. A first name is usual, giving something like `sbg-sarah`.
- 4 **Phone** — needed.
- 5 **Address** and **Email** — optional.
- 6 Press **Create account**.

THE STARTER PASSWORD IS SHOWN ONCE

GymOS shows you a password to pass on to them. It is displayed **this one time only** and cannot be looked up again. Write it down or send it before you press **Done**. If you lose it, just create the account again under a slightly different username.

Give them the username and that password. The first time they sign in, GymOS makes them pick their own. You won't know their password — and that's the point: it's what makes "collected by [name]" mean something.

If you see "*That username is already taken.*", add an initial — `sbg-sarahb`.

■ One person's page

Click any row on the Team list. You'll see their details, and underneath, everything they've done — newest first:

WHAT IT SAYS	WHAT THEY DID
Registered member	Signed up a new member — the name and number are shown.
Collected membership payment	Took a membership payment.
Collected equipment payment	Took an equipment payment.
Recorded attendance	Checked a member in.

This is how you check a shift was really worked, review somebody's first week, or trace a particular record back to a person.

Edit contact info lets you fix their **phone** and **email**. Their name and username can't be changed after the account is made.

■ If somebody forgets their password

You can put a receptionist back on the starter password yourself. There is no "forgot password" email in GymOS, so this is how a forgotten password gets fixed.

- 1 Open **Team** and click the person.
- 2 Press **Reset password** and confirm.
- 3 GymOS shows you the starter password, `Welcome123`. Give it to them.
- 4 They sign in with it, and GymOS immediately asks them to choose a new password of their own.

YOU STILL WON'T KNOW THEIR PASSWORD

You only ever see the starter one. The moment they sign in they pick their own, and you can't see it — which is what keeps "collected by [name]" meaningful.

RESETTING IS NOT THE SAME AS LOCKING SOMEONE OUT

A reset is for somebody who has forgotten their password and still works for you. If you want somebody *out*, use **Suspend** below — that's what actually stops them signing in.

Your provider can do the same for your own owner password — contact them.

■ Suspending an account

The **Suspend** button switches an account off.

WHAT SUSPENDING ACTUALLY DOES

They **cannot sign in at all** until you switch them back on. If they try, GymOS tells them the account has been suspended and to speak to you. It works everywhere — on the web, on a phone, and on the desk computer, *including when that computer has no internet*. There is no way round it.

- If they are signed in at that moment, they are stopped there and then. They don't get to finish the shift.
- **Nothing they recorded is removed.** Every payment, check-in and sign-up stays exactly where it is, still showing their name.
- Their row stays on your Team list marked **Suspended**, so your staff list stays honest.
- **Unsuspend** switches them straight back on, with the same username and the same password they chose.

WHEN SOMEBODY LEAVES

Suspend them the same day. It takes two clicks, loses nothing, and can be undone at any time. There is no reason to leave a departed employee able to sign in.

A DESK COMPUTER THAT IS OFFLINE

A suspension reaches an offline desk computer the next time that computer gets internet. If you need somebody locked out of a machine that is off the internet right now, switch the machine off or take it off the desk until it can connect.

CHAPTER 12

Settings

Where you actually set your gym up: what you sell, at what price, and what your desk asks new members. Do this before anybody signs anybody up.

No extra fields yet.

Appearance

Settings. Your gym's details at the top (you can't change these), then your membership tiers, your equipment plans, and your extra sign-up questions.

■ Your gym's details

ITEM	DETAIL
Identity	Your gym's name and its member code, marked <i>permanent</i> , set by your provider.
Status	Whether your gym is switched on.
Subscription	When it runs out. Your provider looks after this — contact them to renew.

The member code can't change because it's printed into every member number you've issued. Changing it would make old cards disagree with the system.

■ Membership tiers

These are what your desk picks from when signing somebody up. **You need at least one, or nobody can be signed up at all.**

- 1 Press **Create plan** in the Membership tiers box.
- 2 **Name** — what your desk and your members will see. *Standard, Student, Premium.*
- 3 **Price** — a number, in your gym's currency.
- 4 Press **Create plan**.

MEMBERSHIPS ALWAYS LAST A YEAR

There's no length to choose — the box says so. Membership is the yearly right to belong. Shorter selling is what equipment plans are for.

■ Equipment plans

Made the same way, with two extra choices: **how many**, and of what. Together they are the length, so you are not stuck on one week or one month — a 3-week plan is "3" and "Week", a 2-month plan is "2" and "Month". A line under the boxes reads back what you have built before you save it.

LENGTH	RUNS UNTIL	USUALLY FOR
Day	The end of the day it starts.	Walk-ins and casual users.
Week	Seven days later.	Visitors, short programmes.
Month	The same date next month.	The usual choice for most gyms.
Year	The same date next year.	Committed members, usually cheaper overall.

WHEN EQUIPMENT STARTS COUNTING

Not when it's paid for — at the member's **next check-in**. Until then your desk sees **Pending**. So a day pass bought on Monday evening for a Tuesday visit gives them Tuesday, not a wasted Monday. This matters most for daily plans, and it's the thing new receptionists most often get wrong.

THE COUNT MULTIPLIES IT

The table above is one of each. Put a number in **How many** and it multiplies — 3 × Week is three weeks, 2 × Month is two months. Set it to whatever you actually sell.

■ Changing a plan

- **Edit** lets you change the name, the price and (for equipment) the length.
- **Retire** takes a plan out of your desk's list without deleting it. It can't be sold any more, and every past payment on it stays exactly as it was.
- **Reactivate** brings a retired plan back.

HOW TO RAISE A PRICE

Just edit the price. Existing members keep what they paid for until it runs out, because every payment remembers its own amount. The new price applies to the next sale. Use **Retire** instead when you're stopping an offer altogether.

■ Adding members you already had

If you were running the gym before GymOS, your existing members have to get in somehow — and they must **not** be signed up at the desk in the normal way, because that would record every one of them as money taken today and make this month look like your best ever.

Turn on **Adding members you already had** in Settings. An **Add existing** page appears at the front desk, where each old member is entered with the plan they are on and the date it really started. Nothing entered there counts as income.

TURN IT OFF WHEN YOU ARE DONE

That page registers members *without taking payment*. It is exactly what somebody would use to let a friend in free. Switch it off the moment your old book is in, and switch it on again only if you need it.

■ Extra sign-up questions

These are questions your desk asks on top of the built-in ones (name, phone, gender, weight, height, emergency contact, address).

- 1 Press **Add field**.
- 2 **Field name** — the question, worded the way your desk should read it out.
- 3 **Type** — a typed answer, a number, or a Yes/No choice.
- 4 Tick **Required to complete registration** if your desk must not skip it.
- 5 Press **Add field**.

Good ones: *How did you hear about us?*, *Referred by*, *Any medical conditions?* (Yes/No, required), *Occupation*. Remember you can search these answers from the Members page.

RETIRE, DON'T DELETE

Delete is permanent and it warns you. Almost always use **Retire** instead — that stops the question being asked from now on while keeping the answers you've already collected on each member's page.

■ Colours and your password

At the bottom: **Light**, **Dark** or **System** (saved on your device only), and a **Change password** button. Changing your password asks for your current one first. On a phone this is the only place the look is changed — there's no toggle in the header.

CHAPTER 13

Downloads

Covered fully in Chapter 4. This is the short version.

ITEM	NOTES
GymOS desktop app	The program for a desk computer. Owner accounts only — receptionists never see it. Only shown in a web browser, and hidden inside the installed app. Large, around 120 MB.
Owner's guide	This booklet. It covers the front desk too, so you can train staff from it.

Your receptionists have their own Downloads page too, but it holds only the front-desk guide. On their phones it sits inside Settings rather than taking a button of its own.

Each item shows its version and date, so you can tell whether your desk computers are running the current version before you go chasing a problem that reinstalling would fix.

IF YOU SEE	WHAT IT MEANS
Not available yet — check back shortly.	Your provider hasn't published that file.
Downloads need an internet connection.	You're in the desk app with no internet. This page always needs it.

Your subscription

Your gym pays your provider for GymOS. Here's what happens at each stage.

■ If you started on a free trial

Many gyms start with a free trial — one, two, three or six months of the full software, free, so you can try it properly before paying. Your provider sets this when they create your gym.

- Nothing is limited or watered down. It is the complete product.
- Your **Settings** page shows **Free trial** and the date it runs to.
- When it ends, the gym locks exactly like a lapsed subscription — and **nothing you recorded is lost**. Every member, payment and visit comes straight back the moment a paid plan is added.

BEFORE YOUR TRIAL ENDS

Note the date now and talk to your provider a week before. That way the desk never meets a locked screen on a busy morning.

■ The four stages

STAGE	WHAT IT MEANS	WHAT YOUR GYM SEES
Active	Paid up.	Everything normal.
Grace	Just past the date, inside the short grace period.	Everything still works. Renew now.
Expired	Past the grace period.	Locked everywhere — on the web, on a phone and on the desk app.
Locked	Switched off by your provider.	Locked everywhere at once.

You can check this any time in **Settings**, under Subscription.

■ What being locked looks like

The whole app is replaced — for you *and* your desk — with one message:

Subscription expired

"This gym's access is currently locked. Contact your provider to reactivate — nothing has been lost, and everything returns the moment it's unlocked."

- Nobody can work — not you, not any receptionist.
- The desk can't sign anybody up, check anybody in, or take money.
- **Nothing is deleted.** Every member, payment and visit is still there and comes straight back when it's switched on again.
- There is nothing to fix on your side. Contact your provider.

THE DESK APP LOCKS ITSELF TOO

Being offline is not a way round this. The desk app keeps track of time on the machine and locks itself once the grace period passes, whether or not it has internet — and changing the computer's clock doesn't help.

DON'T GET CAUGHT OUT

Check the date in Settings at the start of each month and put it in your calendar with a week's warning. A locked gym on a Saturday morning is an expensive reminder.

When the internet is down

How your desk keeps working through an outage — and why a payment might be on the desk computer before it reaches your screen.

■ How it works

The desk app keeps its own copy of your gym's information on the computer. Every sign-up, payment and check-in is saved **there first** and marked as waiting. Sending it up is a separate step.

THE PART THAT MATTERS TO YOU

Nothing is ever lost to an outage. But until it has been sent, **you cannot see it** — not on your Dashboard, not in Finances, not in Attendance. A quiet-looking day might just be an unsent one.

■ When it gets sent

- **Automatically, once**, every time somebody signs in with the internet working.
- **By hand**, when somebody presses the send button in the menu. It asks for their password first, which is how GymOS knows it's really them.

■ What to tell your staff

- 1 Press send once when you arrive.
- 2 Press it again as soon as the internet comes back.
- 3 Press it before you hand over, and check the waiting number reaches zero.
- 4 If it says some records didn't go through, say so — don't just try again quietly.

■ Signing in without internet

- Only works for somebody who has signed in **with internet, on that computer, before**.
- Lasts **14 days** from their last proper sign-in there, and restarts each time.
- A suspended account still can't get in, with or without internet.

■ If you think something's missing

- 1 Check the waiting number on the desk computer first.
- 2 If it's above zero, have them send with good internet, then look again.
- 3 If a message named a reason in brackets, pass those exact words to your provider.
- 4 If it won't clear after several tries with working internet, that's for your provider, not your desk.

The front desk

Everything your receptionists see and do, so you can set it up properly and train them without guessing.

■ 16.1 What they can and can't do

They can

- Find members and check them in
- Sign up new members
- Take payments and renewals
- Fix member details and photos
- See their own takings
- Change their own password

They can't

- Change plans or prices
- Add or remove staff
- Undo a payment or a check-in
- See the gym's total takings
- See another receptionist's takings
- Change anything about the gym

■ 16.2 Their screen

The screenshot shows the GymOS front desk interface. On the left is a sidebar menu with the following items: a green button with a plus icon and the text 'Register a new member', a green button with a checkmark icon and the text 'Check-in', a list item with a person icon and the text 'Members', a list item with a bar chart icon and the text 'Finances', a list item with a download icon and the text 'Downloads', and a list item with a gear icon and the text 'Settings'. At the bottom of the sidebar is a rounded rectangle containing a green circle with the letter 'R' and the text 'Reception', and a black circle with a white right-pointing arrow. The main area on the right is titled 'Check-in' and contains the text 'Search by name, phone, or member number to find who's here.' Below this is a section titled 'Find a member' with a horizontal line. Underneath are two input fields: 'Name or phone' with a magnifying glass icon, and 'Member number' with a dropdown menu showing 'SBG-' and an empty input field.

What your desk sees. A short menu and one green button. They land on Check-in when they sign in.

MENU ITEM	WHAT IT'S FOR
Check-in	Find one person fast. Where they spend most of the day.
Members	The full list, for browsing.
Finances	Only the money they personally took. Today or all time.
Settings	Their details, colours, password — and their copy of the front-desk guide.

On a phone their bar holds those same four, and the green **Register a new member** button becomes a round + above it — shown only on Check-in and Members, where adding somebody is the obvious next step. There's no **More** button on a desk account because nothing is left over.

■ 16.3 Checking somebody in

Two search boxes: **Name or phone** (any part of either), and **Member number** (your gym's code is fixed in front, they type only the digits). Results appear as they type.

Membership & equipment

MEMBERSHIP	EQUIPMENT
Active Standard Annual - expires 9 Aug 2027 Renew early	None Activate

Entry blocked
Membership **Active**
Equipment **Expired**

[Record attendance](#) Equipment access has run out — collect an equipment payment to let them in.

Details [Edit details](#)

GENDER	DATE OF BIRTH	WEIGHT
Female	26 Dec 1992	51 kg
HEIGHT	EMERGENCY CONTACT	ADDRESS

The desk version has what yours doesn't: **Renew** / **Activate** buttons, the coloured entry box, and the green **Record attendance** button.

ON THE PAGE	WHAT IT DOES
Add photo / Change	Adds or replaces the member's picture. Never required.
Membership & Equipment	Each has <i>Renew</i> , <i>Renew early</i> or <i>Activate</i> , which opens the plan list and a <i>Collect payment</i> button.
The coloured box	Green <i>Entry allowed</i> only when both are green; otherwise red <i>Entry blocked</i> .
Record attendance	The main button. Goes grey once used today, and while membership has run out.
Edit details	Fixes their personal details. Never touches payments or visits.

TEACH THIS ONE EXPLICITLY

Both boxes must be good before anybody can be checked in. Somebody green on membership but red on equipment cannot be let in to train, and the desk will find the **Record attendance** button switched off — that is deliberate, not a fault. The one case that looks like an exception is equipment just paid for: it reads **Starts today** and *does* let them in, because that check-in is what starts it.

■ 16.5 Signing somebody up

The screenshot shows a web application for 'GymOS Sabluurashid'. On the left is a sidebar with navigation links: Check-in, Members, Finances, Downloads, and Settings. At the bottom of the sidebar is a 'Reception' button with a clock icon. The main content area is titled 'New member registration' with a 'Back' link. Below the title is a instruction: 'Complete the form below to enroll a new member.' The form is divided into three sections: 'Personal details', 'Membership', and 'Equipment access'. The 'Personal details' section includes fields for Full name, Phone number, Gender (a dropdown menu currently showing 'Male'), Date of birth (optional) in mm/dd/yyyy format, Photo (optional) with a 'Choose File' button, Weight (kg), and Height (cm). A note states: 'Not needed to register — some gyms collect a passport photo, some don't, and it's always fine to add or change one later from the member's profile.' The 'Membership' section has a 'Required to register.' section with radio buttons for 'Standard' and 'Annual' (selected), with a '1 year' duration and a price of 'N50,000'. The 'Equipment access' section has a checkbox for 'Pay for equipment access now'. The 'Emergency contact & address' section includes fields for Emergency contact name, Emergency contact phone, Address, and Email (optional).

The sign-up form. Details on the left, the plan on the right. Your extra questions appear here too.

They must fill in: full name, phone, gender, weight, height, emergency contact name and phone, address, and a membership plan. Optional: date of birth, email, photo, and equipment. Any question you marked required is enforced by name.

Typing a phone number checks for duplicates live. If it finds any, the desk has to tick **Create a new member anyway** to carry on — which is exactly the pause you want.

■ 16.6 The waiting rule

- Equipment shows **Pending** between paying and the next check-in. **Teach this or you'll be charging people twice.**
- **Renew early** starts the new period today — the desk should say so before taking money.
- Nothing can be undone. Mistakes come to you.

Payments you collected

Total: **NO** across 0 payment(s).
No payments in this range.

Their takings only. Your Finances page shows the same payments, everybody's together, with the name on each row — so end-of-shift checks compare two views of identical numbers.

■ 16.8 What to cover when training somebody

- ☐ Signing in, picking their own password, and where sign-out is
- ☐ That it signs itself out after 6 hours untouched — and that handing the desk over means pressing sign-out, not waiting for that
- ☐ The two items, and that both must be green for **Entry allowed**
- ☐ That both membership and equipment must be good before anyone can be checked in
- ☐ That equipment starts at the next check-in — the **Pending** rule
- ☐ One check-in per member per day
- ☐ That payments and check-ins can't be undone
- ☐ The duplicate-phone warning, and to look before overriding it
- ☐ Checking cash against **Finances** → **Today** at the end of a shift
- ☐ Desk computer: pressing send, and clearing the waiting number before handover
- ☐ What **Subscription expired** means, and to tell you at once

Setting up from scratch

The order matters. Do it this way and your desk can open without anybody being stuck.

- 1 **Sign in on the web** with the details from your provider, and pick your own password.
- 2 **Check whether you're on a free trial** and note the date it ends — Settings shows it.
- 3 **Check your Settings.** Confirm your gym's name, note the member code, and check the subscription date.
- 4 **Create your membership tiers.** At least one, or nobody can be signed up. They last a year.
- 5 **Create your equipment plans** — whichever lengths you actually intend to sell.
- 6 **Add any extra sign-up questions.** Much easier now than after two hundred members have been signed up without them.
- 7 **Create your receptionist accounts.** Write each starter password down before pressing Done.
- 8 **Download the desk app** and install it on the desk computer (Chapter 4).
- 9 **Have every receptionist sign in on that computer once, with internet.** This is what lets them work during an outage later.
- 10 **Do one test sign-up yourself** from start to finish — sign somebody up, take an equipment payment, check them in, and watch **Pending** turn green. Then check it shows in your Finances and Attendance.
- 11 **Train your desk** from Part Two, or hand them the front-desk guide from their own Downloads page.

■ Choosing your plans

DECISION	SUGGESTION
How many tiers?	Two or three. Every extra one is another decision at the desk while somebody waits.
Name them plainly	<i>Standard, Student, Couples.</i> Your desk reads these out loud.
Equipment lengths	A daily and a monthly cover most gyms. Add weekly only if you'll really sell it.
Extra questions	Three or four at most. Each one is a question asked of somebody standing at your desk.

■ Help — who to ring

There is a **Help** page in your menu. It shows the name and phone number of the person who set your gym up on GymOS — the fastest route to an answer, because they know both the software and your gym.

It also lists what they can and cannot do. They can walk you through any screen and sort out billing; they **cannot** see your members, your money or your attendance, and nobody can read anybody's password. Your receptionists have the same page, so they are not stuck waiting for you to look a number up.

If something looks wrong

Every message you're likely to meet.

■ Screens that replace the app

SCREEN	WHAT IT MEANS
Subscription expired	Your gym is locked. Nothing lost. Contact your provider.
Account suspended	That account has been switched off. For a receptionist, you can switch it back on from Team. For your own account, contact your provider.
No account is set up for...	The password worked but no account is attached. Contact your provider.
Back at the sign-in screen	The 30-minute rule. Sign in again.

■ Messages on a page

MESSAGE	WHAT IT MEANS
Couldn't load the dashboard.	A connection problem, not an empty gym.
Couldn't load members / attendance / payments.	That page's information didn't arrive. Check the internet.
Couldn't create the account.	The receptionist wasn't created. Try again.
That username is already taken.	Pick a different one.
Couldn't create the plan / save changes.	Nothing saved. Try again.
Current password is incorrect.	On the password form, the top box is wrong.

■ Situations

SITUATION	WHAT TO DO
A payment is missing from Finances	Check the waiting number on the desk computer first, then the member's own Payments tab, then ask which receptionist took it.
Today's attendance is zero at midday	Either the desk isn't checking people in, or the desk computer hasn't sent its work up.
A member says they paid but shows expired	Open their page → Payments tab. Check the date against the plan length, and make sure it's the right person.
A receptionist can't sign in without internet	They've never signed in properly on that computer, or it's been over 14 days.
Two records for one person	The duplicate warning was overridden. Nothing can be merged or deleted — decide which one is live and tell the desk to use only that.
Old payments look wrong after a price change	They aren't. Every payment keeps the amount charged at the time.
Equipment has said Pending for days	Correct. That member hasn't been checked in since paying.

■ When to contact your provider

- ☐ The **Subscription expired** screen, or a status of Locked or Expired
- ☐ Your gym's name, member code or currency needs changing
- ☐ You need another branch, or another owner account
- ☐ You've lost your owner password
- ☐ A sending problem keeps coming back with a reason in brackets
- ☐ Anything that survives a good connection and a fresh sign-in

Your routine

Ten minutes a day, twenty a week. That's all GymOS asks of you.

■ Every day — two minutes

- ☐ Open the **Dashboard**
- ☐ Compare today's attendance and today's money against a normal day
- ☐ Glance at **Expiring in 7 days** — if it's climbing, open it

■ Every week — twenty minutes

- ☐ Open **Expiring soon** and ring every name on it
- ☐ **Finances** → **Weekly**: compare with last week, and read down the plan names
- ☐ **Attendance** → **This week**: see which hours are busy and which are dead
- ☐ **Members** → **Expired Membership**: pick a few to win back
- ☐ Check the desk's waiting number has been reaching zero

■ Every month — half an hour

- ☐ **Finances** → **Custom** across the finished month; write the total down
- ☐ Compare **Active members** on the Dashboard with **Members** → **Active Membership** — the gap is how many have lapsed
- ☐ Check your subscription date in **Settings** and diarise a week's warning
- ☐ Review your plans and prices; retire what isn't selling
- ☐ Open each staff page in **Team** and skim what they've been doing
- ☐ Suspend anybody who has left
- ☐ Check **Downloads** for a newer version of the desk app

■ The five numbers that matter most

NUMBER	WHERE	WHY
Expiring in 7 days	Dashboard	The only number you can still do something about.
Active Membership count	Members, filtered	Your real paying base, not just your list size.
Weekly revenue	Finances → Weekly	Long enough to be steady, short enough to still fix.
Weekly check-ins	Dashboard graph	Falling attendance predicts falling renewals, weeks ahead.
The waiting number	The desk computer	Anything above zero means your figures are incomplete.

GymOS — Owner's Guide. Part Two doubles as training material for new desk staff; they also have their own shorter guide on their Downloads page. Anything about your subscription, your gym's name, member code or branches goes to your provider.

gymos.africa
