CHAPTER 1

What GymOS does for you

GymOS is where you look someone up, see whether they are paid up, and let them in. It also remembers who came and who paid.

■ Every member has two things

When you open a member's page, you will see two boxes side by side. These are the two things a member pays for, and they are counted separately.

THE BOX	WHAT IT MEANS
Membership	Their right to belong to the gym. Everybody must have one. It lasts a year .
Equipment	Their right to use the machines. This is extra, and paid for separately. It might last a day, a week, a month or a year — whatever your owner set up.

Someone can be paid up on one and not the other. GymOS shows you both and tells you plainly whether to let them in.

■ What you can do

- Find members and check them in
- Sign up brand-new members
- Take payments and renew people who have run out
- Fix a member's details, and add their photo
- See the money *you* took
- Change your own password

■ What only your owner can do

- **Set the prices and the plans.** If a price looks wrong, or the plan someone wants isn't in the list, tell your owner.
- **Add or remove staff.**
- **See the whole gym's takings.** You see your own.

THE ONE THING TO REMEMBER

Once you press a button that takes a payment or records a visit, **it cannot be undone** — not by you, not by your owner. So take one second to check you have the right person and the right plan before you confirm. This protects you too: nobody can quietly change what you recorded.

■ Where you'll use it

WHERE	WHAT IT'S LIKE
The desk computer	GymOS is installed on it. It keeps working even when the internet is down. This is the normal way to work.
A web browser	You go to gymos.africa and sign in. Needs internet all the time.
A phone	The same thing, arranged to fit a small screen.

Everything in this guide works the same way in all three. Where something only applies to the desk computer, it says so.

CHAPTER 2

Your first time signing in

You don't make your own account. Your owner makes it for you and gives you two things.

The sign-in screen. Your username goes in the top box, your password in the one below.

■ What your owner gives you

ITEM	WHAT IT LOOKS LIKE
A username	Your gym's short code, a dash, then your name — like <code>sbg-reception</code> . It's all small letters. It is <i>not</i> an email address.
A starter password	A password the system made up. Your owner can only see it once, so write it down when they give it to you.

■ Signing in, step by step

- 1 Open GymOS — double-click the **GymOS** icon on the desk computer, or go to **gymos.africa** and open the sign-in page.
- 2 Type your username in the **Username** box. Include the dash.

- 3 Type the starter password in the **Password** box.
- 4 Press **Sign in**.
- 5 GymOS says hello and asks you to **pick your own password**. This only happens once.
- 6 Type a new password, then type the same one again underneath.
- 7 Press **Set password**. You land on the Check-in screen, ready to work.

■ Rules for your new password

- At least **6 characters**.
- Both boxes have to match.
- Nobody else can see it — not even your owner. It is yours.

PICK A GOOD ONE

You'll type this many times a day with someone standing in front of you. Pick something you can type fast without looking — but not your name, not the gym's name, and not `123456`. Three ordinary words stuck together works well.

IF YOU FORGET YOUR PASSWORD

Don't worry — your owner can reset it for you. They'll put your account back on the starter password `Welcome123` and tell you. Sign in with that, and GymOS will ask you to pick a new password of your own straight away. Nobody, including your owner, ever sees the password you choose.

CHAPTER 3

Signing in each day

After the first time, it's just your username and password, and you go straight to Check-in.

■ If it won't let you in

GymOS shows a short message in red. Here is what each one means.

THE MESSAGE	WHAT TO DO
Incorrect username or password.	Type both again slowly. Check the Caps Lock light. Check you included your gym's code and the dash.
Too many attempts. Wait a moment and try again.	Too many wrong tries in a row. Wait a few minutes and it will let you try again.
Can't reach the server. Check your internet connection and try again.	The internet is down. On the desk computer you can still get in (see Chapter 13). In a browser you have to wait.
Incorrect username or password, <i>and you're sure it's right</i>	Your owner may have reset your password. Ask them — if they have, sign in with <code>Welcome123</code> and pick a new one.
This account has been suspended. Ask the gym owner to switch it back on.	Your owner has paused your account. Only they can turn it back on. Nothing you recorded has been lost.
This account hasn't signed in on this device before...	Desk computer only. You have never signed in on <i>this</i> computer while the internet was working, so it can't check you. Wait for the internet.
This device hasn't been online in over 14 days...	Desk computer only. Get the computer back online and sign in once — that starts the clock again.

■ Signing out

The sign-out button is the small arrow next to your name at the bottom of the menu. Use it whenever you leave the desk and someone else takes over.

IT SIGNS YOU OUT ON ITS OWN

If nobody touches the mouse, keyboard or screen for **6 hours**, GymOS signs you out by itself. That is longer than a shift, so it should not catch you mid-desk. It's not a fault — just sign in again.

Closing the app and opening it again does not sign you out, on a computer or a phone. You stay signed in until 6 hours have passed with nobody using it — so when you leave the desk to somebody else, use the sign-out button rather than waiting.

CHAPTER 4

Getting to know your screen

There are four places to go and one big green button. That's the whole thing.

Your home screen. The menu runs down the left. The green button at the top is for signing up a new member. Your gym's name sits under the GymOS logo, and your own name is at the bottom.

■ The four places

MENU ITEM	WHAT IT'S FOR
Check-in	Where you start. Find one person fast. You'll be here most of the day.
Members	The full list of everyone, in name order, for browsing.
Finances	The money you took, today or ever.
Settings	Your details, the colours, your password — and your copy of this guide.

■ The green button

Register a new member is a button, not a menu item, because it's something you *do* rather than somewhere you look. On a phone it turns into a round green + in the bottom corner.

On a phone that + only appears where it makes sense — on **Check-in** and on **Members**. You won't see it on Finances, Settings or somebody's profile, because there's nothing to add there.

■ On a phone it looks like this

The same screen on a phone. Four buttons along the bottom, and the green round + button above them for signing somebody up.

■ Bits that are always there

- **Your gym's name** under the GymOS logo.
- **Your name** at the bottom with your first letter in a green circle — a quick check that it's really your account.
- **The moon button** (on a computer) switches between the light and dark look. On a phone that choice lives in **Settings** instead, where there's room for all three options.
- **The arrow button** signs you out.
- ← **Back** appears at the top of a member's page to take you back.

CHAPTER 5

Checking a member in

Somebody walks in. You find them, look at the colour, and either wave them through or take their money. It should take a few seconds.

■ The two search boxes

There are two boxes. You can use either one — the results show up underneath in the same list.

BOX	HOW TO USE IT
Name or phone	Type any part of their name or any part of their phone number. Part of it is enough — typing <code>ada</code> finds Ada Peters. Your typing cursor starts here, so you can just begin.
Member number	Your gym's code is already printed in front of the box and can't be changed. Just type the numbers. If their card says <code>SBG-0073</code> , type <code>0073</code> .

The list appears as you type. There is no search button to press.

🌙 ➡️

Check-in

Search by name, phone, or member number to find who's here.

Find a member

Name or phone

Member number

🔍 Ada

SBG-

#	MEMBER NO.	NAME	PHONE
1	SBG-0073	Ada Peters	09093190896
2	SBG-0066	Ada Abiodun	09012488812
3	SBG-0062	Ada Vincent	09145590589

Searching for "Ada". Everyone matching shows up underneath.  Click or tap anywhere on their row to open their page.

THE QUICKEST WAY

If they hand you a card, use the member number box — it always finds exactly one person. Use the name box when they've forgotten their card, and the phone number when two members have the same name.

■ What you might see instead

- **An empty screen** — you haven't typed anything yet. To look through everybody instead, go to **Members**.
- **"No matches."** — nobody fits what you typed. Try fewer letters, or search their phone number. If they really are new, sign them up.
- **"Couldn't load members."** — the list didn't arrive. Check the internet, or see Chapter 13.

■ The routine

- 1 Type in whichever box suits what they gave you.
- 2 Tap their row to open their page.
- 3 Look at the big coloured box: green **Entry allowed**, or red **Entry blocked**.
- 4 If something has run out, take the payment first.
- 5 Press **Record attendance** — once.

CHAPTER 6

The member's page

Everything about one person on one screen. This is where you'll spend the rest of your day.

The screenshot shows a mobile app interface for GymOS Sabiliurashid. On the left is a sidebar with navigation options: 'Register a new member' (green button), 'Check-in', 'Members', 'Finances', 'Downloads', and 'Settings'. At the bottom of the sidebar is a 'Reception' button with a clock icon. The main content area is for a member named Ada Peters. At the top, there's a back arrow, a large green circle with the letter 'A' (with an 'Add photo' link below it), a member ID 'SBG-0073' in a grey pill, and the name 'Ada Peters' with a phone number '09093190896'. Below this is a section titled 'Membership & equipment'. It contains two columns: 'MEMBERSHIP' and 'EQUIPMENT'. The 'MEMBERSHIP' column shows 'Active' in a green pill, 'Standard Annual · expires 9 Aug 2027', and a 'Renew early' button. The 'EQUIPMENT' column shows 'None' in a red pill and an 'Activate' button. Below these columns is a large pink box labeled 'Entry blocked' in red. It contains 'Membership' with an 'Active' green pill and 'Equipment' with an 'Expired' red pill. Below the pink box is a green 'Record attendance' button. At the bottom is a 'Details' section with an 'Edit details' button. It contains a table with member information.

GENDER	DATE OF BIRTH	WEIGHT
Female	26 Dec 1992	51 kg
HEIGHT	EMERGENCY CONTACT	ADDRESS

A member's page. Their photo and number at the top, then the two boxes for Membership and Equipment, then the big coloured box telling you whether to let them in, then the green **Record attendance** button.

■ The top — who they are

- **Their photo**, or a big green circle with the first letter of their name if there isn't one. Underneath it says **Add photo** (or **Change**). Tap it, pick a picture, and it uploads.
- **Their member number** in the small grey pill.
- **Their name and phone number.**

ABOUT PHOTOS

A photo is never required. Some gyms take one, some don't, and you can always add one later. If a photo won't upload, nothing else is affected.

■ Membership & equipment

Two boxes side by side. Each shows a coloured label and, underneath, which plan it is and when it runs out.

LABEL	WHAT IT MEANS	THE BUTTON SAYS
Active	Paid up and still running. The date underneath is when it ends.	Renew early
Expired	They had it before, and it has run out.	Renew
None	They have never had this. Common for equipment.	Activate
Pending	Equipment only. They have <i>paid</i> , but it hasn't started yet — it starts the next time you check them in.	No button. Nothing to do.

■ The coloured box

Underneath, a wide box says either **Entry allowed** in green or **Entry blocked** in red, and lists both items so you can see which one is the problem.

HOW IT DECIDES

It only says **Entry allowed** when *both* Membership and Equipment are green. If either is red, the whole box is red.

The box is advice for you, not a lock on the door. Whether somebody with a good membership but no equipment access may come in and use the floor is your gym's rule, not the software's. Ask your owner what they want, and do that.

■ The Record attendance button

WHAT THE BUTTON SAYS	WHAT IT MEANS
Record attendance (green)	Ready. Press it once.
Already checked in today (grey)	You already did this today. It comes back tomorrow.
Grey, with "Collect a membership payment to enable check-in."	Their membership has run out. Renew it first.

WORTH KNOWING

Checking someone in only needs their **membership** to be good. Equipment can be red and you can still check them in — and in fact you *must*, because checking them in is exactly what starts newly-bought equipment access running.

■ The Details section

Further down: gender, date of birth, weight, height, emergency contact, address and email — plus any extra questions your owner added.

Press **Edit details** to fix any of them, then **Save details**. This only changes who they are. It never touches their payments or their visits.

■ Payments and Attendance

At the very bottom are two tabs:

- **Payments** — everything they have ever paid: the plan, the amount, the date and time. Newest first.
- **Attendance** — every visit, newest first.

Use Payments when someone asks "when did I last pay?" and Attendance for "when was I last here?".

■ The same page on a phone

■ On a phone the same things stack one under the other. Scroll down for the details and history.

CHAPTER 7

Signing up a new member

The longest form in GymOS, and the one worth slowing down for — at the end, the person gets a member number that stays with them forever.

The sign-up form. Personal details on the left, the plan they're paying for on the right. On a phone the plan section sits underneath instead.

■ Personal details

BOX	MUST FILL?	NOTES
Full name	Yes	This is what you'll search for later, so spell it the way they'd say it.
Phone number	Yes	GymOS checks for anyone who already has this number while you type.
Gender	Yes	It starts on Male, so change it on purpose.
Date of birth	No	A little calendar.
Photo	No	You'll see a preview and a Remove button. Can be added later.
Weight (kg)	Yes	Numbers only.
Height (cm)	Yes	Numbers only.

■ If someone already has that phone number

While you type a phone number, GymOS quietly looks for anyone who already has it. If it finds someone, a red box appears listing them by name and number.

- 1 Click their name in the red box to see whether it really is the same person.
- 2 If it is, you don't need a new member at all — just renew the one that already exists.
- 3 If it genuinely is somebody else sharing a family or work phone, come back and tick **Create a new member anyway**.
- 4 If you don't tick it, GymOS won't let you finish.

■ Emergency contact and address

BOX	MUST FILL?	NOTES
Emergency contact name	Yes	Somebody other than the member.
Emergency contact phone	Yes	Read it back to them to be sure.
Address	Yes	Anything you like.
Email	No	If you fill it in, it has to look like an email.

■ Extra questions

If your owner added their own questions, they appear in their own box. Some are typed answers, some are numbers, some are a Yes/No choice. Ones marked (*optional*) can be skipped; the rest have to be filled in.

■ Membership — always needed

On the right is the **Membership** box, marked *Required to register*. Pick one plan from the list. Nobody can be signed up without one.

If it says "*No membership tiers yet — ask your owner to create one.*", you genuinely cannot sign anybody up. Tell your owner.

■ Equipment — only if they're paying now

Underneath is a tick box: **Pay for equipment access now**. Tick it and a list of plans appears. Leave it alone if they only want membership — equipment can be added any day later.

■ Finishing

- 1 Press **Register member**.
- 2 GymOS gives them the next member number for your gym — your code plus four digits, like `SBG-0110`. Numbers are never repeated, even if two desks sign somebody up at the same second.
- 3 Their membership payment is recorded and their year starts today.
- 4 If you ticked equipment, that payment is recorded too — but it does **not** start yet. It starts the first time you check them in.
- 5 You land on their new page. Read their member number out to them, or write it on their card.

■ If something's missing

GymOS stops and tells you exactly what — "*Enter the member's weight.*", "*Select a membership plan — required to register.*" Fix that one thing and press again. **Cancel** throws the whole form away without saving.

IF IT FAILS

"*Couldn't register this member.*" means **nothing was saved** — no member and no payment. Try again. Afterwards, search for their name to make sure they only appear once.

CHAPTER 8

Taking payments

Every payment after sign-up happens on the member's own page, in the Membership and Equipment boxes.

■ How to take one

- 1 Find the member and open their page.
- 2 Look at the two boxes — Membership on the left, Equipment on the right.
- 3 Press **Renew**, **Renew early** or **Activate** — whichever the button says.
- 4 A list of plans appears. Pick the one they're paying for, and check the price against the money in your hand.
- 5 Press **Collect payment**.
- 6 The label and the date update straight away, and the payment appears at the bottom of the page.

■ How long each plan lasts

PLAN	RUNS UNTIL
Daily	The end of the day they bought it. Bought at 6 in the morning or 8 at night, it covers that day and ends at midnight.
Weekly	Seven days later.
Monthly	The same date next month.
Yearly	The same date next year. All memberships are yearly.

The clock runs on days, not on visits. Somebody who buys a month and only comes twice still runs out after a month.

■ Renew early

When something is still running, the button says **Renew early**. Use it when a member wants to pay ahead — but tell them first that **the new period starts today**. Paying two weeks early does not add those two weeks on.

■ The waiting state on equipment

READ THIS ONCE AND REMEMBER IT

Equipment does **not** start when it's paid for. It starts the next time you **check them in**. In between, the label says **Pending**.

This exists so that somebody who pays for a day pass on Monday evening to use on Tuesday actually gets Tuesday. What it means for you:

- While it says **Pending**, there's nothing to do and no button. **Do not take a second payment.**
- The moment you press **Record attendance**, it starts and turns green with a real end date.
- So somebody who has just paid for equipment *needs* you to check them in. Do it even if the big box is red.

■ Common situations

THEY SAY...	YOU DO
"I want to join."	Sign them up. The membership payment is part of signing up.
"My membership finished."	Open their page, press Renew on Membership, pick a plan, take the money, then check them in.
"I want to use the machines today."	Press Activate or Renew on Equipment, pick the daily plan, take the money, then check them in to start it.
"I paid yesterday but it says pending."	That's right and normal. Check them in now — that starts it.
"Can I pay for next month now?"	Yes — Renew early . Tell them it starts today.
"I paid the wrong amount."	You can't undo a payment. Tell your owner. The record stays as it is and they sort it out.

IF IT FAILS

"*Couldn't record the payment.*" means nothing was charged. Try again, then look at the Payments list at the bottom of their page to check it's there exactly once.

CHAPTER 9

Looking through your members

The full list, in name order, for when you want to look rather than search.

The Members list. The number in the heading is how many people are on the books. The magnifying glass at the top right opens a search box.

■ Using it

- Everyone is listed A–Z with their number, name and phone.
- Tap the **magnifying glass** to open a search box. Type a name, a member number or a phone number to shorten the list.
- Tap it again to close it — that also clears what you typed and brings everybody back.
- **Tap any row** to open that person's page.

■ Check-in or Members?

USE	WHEN
Check-in	Somebody is standing in front of you and you need them now.
Members	You're answering a question, looking someone up on the phone, or you're not sure who you're after.

CHAPTER 10

Money you took

Your own record of your shift — the payments you personally took.

Payments you collected. The total and the number of payments are at the top. Use the filter button to switch between **Today** and **All time**.

■ What's on it

The heading says **Payments you collected**, and that's exactly what it is — the money taken while *you* were signed in. Another receptionist's payments don't show here, and yours don't show in theirs. Your owner sees everybody's together.

Each row shows the plan, whether it was membership or equipment, the amount and the time. Newest first.

DO THIS AT THE END OF EVERY SHIFT

Set the filter to **Today** and check the total against the cash in the drawer. If there's a difference, it is far easier to explain now than tomorrow.

If it says "**No payments in this range.**" on Today, you simply haven't taken any money yet today.

CHAPTER 11

Your copy of this guide

You can download this booklet yourself, any time, from inside GymOS.

■ Where to find it

WHERE YOU ARE	WHERE TO LOOK
On a phone	Open Settings and scroll to the Downloads box.
On a computer	Downloads in the menu, or the same box inside Settings .

Your guide. Once it has been published you'll see its version and the date it was last updated, with a green **Download** button beside it. Until then it reads *Not available yet*, as it does here.

INSTALLING GYMOS ON THE DESK COMPUTER

That's your owner's job, not yours — the installer isn't offered on a desk account. If the desk computer needs GymOS installed or reinstalled, ask your owner.

■ If you can't download it

- **"Not available yet — check back shortly."** — nothing has been published yet. Nothing you can fix.

- **"Downloads need an internet connection."** — you're on the desk computer with no internet. This one thing always needs it.

Your settings

Three small boxes. Everything here is about you, not about the gym.

Current password

New password

Confirm new password

Settings. Who you're signed in as, the light or dark look, and your password.

Signed in as

Your name, your username and your gym. You can't change these here. Worth a glance before you record anything, just to be sure it's your account.

To change your name or phone number, ask your owner.

Appearance

Three choices: **Light**, **Dark** and **System**. Light and Dark stay as you set them. System follows whatever the computer or phone is doing. This only affects the device you're on.

On a phone this is the only place the look is changed — there's no moon button in the header, because the header has room for your gym's name or the controls, not both.

■ Downloads

Your copy of this guide lives here too, so you don't need a separate place to look for it. See Chapter 11.

■ Change password

- 1 Type your **current password**.
- 2 Type the new one twice.
- 3 Press **Change password**. A small *"Password changed."* appears.

MESSAGE	WHAT IT MEANS
Current password is incorrect.	The top box is wrong, not the new ones.
New password must be at least 6 characters.	Make it longer.
New passwords don't match.	The two new boxes are different. Type both again.

CHANGE IT IF...

Somebody watched you type it, you wrote it down and lost the paper, or you use it for something else too.

FORGOTTEN IT COMPLETELY?

Ask your owner to reset it. They'll give you the starter password `Welcome123`, and GymOS will ask you to choose a new one the moment you sign in.

When the internet is down

This chapter is only about the desk computer. If you use GymOS in a web browser, you can skip it.

■ You can keep working

The desk computer keeps its own copy of everything. When the internet goes down, nothing stops — you can still search, sign people up, take money and check people in. Everything is saved on the computer straight away.

NOTHING GETS LOST

Every record is saved on the computer *first*. Sending it to the internet is a separate step. A power cut or a dead connection never loses your work.

■ Signing in without internet

- It only works if **you personally** have signed in on **that computer** before, while the internet was working.
- It works for **14 days** after your last proper sign-in there. Sign in once with the internet working and the 14 days start again.
- When the internet comes back, it sorts itself out. You don't have to do anything.

■ The send button

At the bottom of the menu, next to your name, there is a button with two circling arrows. Hover over it and it tells you where things stand.

IT SAYS	WHAT IT MEANS
Synced — tap to sync now	Everything has been sent. Nothing to do.
3 pending changes — tap to sync now	Three things are saved here but haven't been sent yet. Send them when you have internet.
Syncing...	It's working. The button spins.
Sync failed — will retry automatically	The last try didn't get everything through. Your work is still safe on the computer.

■ How to send

- 1 Make sure the internet is working.
- 2 Press the button with the circling arrows.
- 3 It asks for **your password**. That's normal — it's how GymOS knows it's really you.

4 Type it and confirm. A small message tells you how it went.

MESSAGE	WHAT TO DO
Synced successfully	Nothing. It's all sent.
Some records didn't sync — still saved here, will retry	Your work is safe on the computer but your owner can't see it yet. Try again later, and tell your owner if it keeps happening.
That password isn't right.	Type it again.
Can't reach the server...	Still no internet. Send later.

WHEN TO PRESS IT

Once when you arrive, once when the internet comes back, and once before you hand over at the end of your shift. That's enough.

ONE THING TO KNOW

Until it's been sent, your owner cannot see it. If your owner says a payment is missing, check the number on that button before assuming it wasn't taken.

If something looks wrong

The few screens and messages that can stop you, and what each one really means.

■ "Subscription expired" fills the screen

- The gym's own subscription to GymOS has run out or been paused. It has nothing to do with any member, and nothing to do with you.
- There is nothing you can do at the desk.
- **Tell your owner straight away** — only they can sort it out.
- Nothing has been deleted. Everything comes back the moment it's switched on again.

■ "Account suspended"

Your owner has paused your account. You can't sign in until they switch it back on. Nothing you recorded has been lost. Speak to your owner.

■ You're back at the sign-in screen and you didn't sign out

Almost always the 30-minute rule from Chapter 3. Sign in again — nothing was lost.

■ A member says they paid, but it says expired

- 1 Open their page and look at the **Payments** tab at the bottom. The payment is either there or it isn't.
- 2 If it's there, check the date — a month bought five weeks ago really has run out.
- 3 Make sure you have the right person. Two members can share a name; compare the phone number.
- 4 If it really isn't there and they're sure, take it to your owner rather than guessing.

■ Messages you might see

MESSAGE	WHAT IT MEANS
Couldn't load members.	The list didn't arrive. Check the internet or the send button.
Couldn't load this member.	That page didn't open properly. Go back and open it again.
Couldn't record attendance.	Not recorded. Try again.
Couldn't record the payment.	Nothing was charged. Try again, then check their Payments tab.
Couldn't register this member.	Nothing was saved. Search their name to be sure, then sign them up again.
Couldn't save these changes.	An edit didn't stick. Try again.
Couldn't upload this photo.	Only the photo failed. Everything else is fine.
No membership tiers yet...	Your owner hasn't set up any plans. You can't sign anybody up until they do.

■ When to call your owner

- ☐ The **Subscription expired** screen appears
- ☐ Your account says it's been suspended
- ☐ A price is wrong, or a plan is missing
- ☐ Money was taken for the wrong amount or the wrong person
- ☐ The number on the send button won't clear after several tries with good internet
- ☐ You've forgotten your password and need it reset
- ☐ Anything you can't explain to the member standing in front of you

Your day at the desk

One page to keep beside the keyboard.

■ Opening up

- ☐ Open GymOS and sign in
- ☐ Check your own name is at the bottom of the menu
- ☐ Desk computer: press the send button once and clear anything waiting
- ☐ You should be on **Check-in** with the cursor ready

■ A member arrives

- ☐ Search — member number if they have their card, otherwise name or phone
- ☐ Tap their row
- ☐ Read the coloured box
- ☐ If anything has run out, take the payment first
- ☐ Press **Record attendance** once

■ A new member arrives

- ☐ Press **Register a new member**
- ☐ Fill in every box it asks for
- ☐ Check the red box if it warns about the phone number
- ☐ Pick a membership plan; add equipment only if they're paying for it now
- ☐ Press **Register member**
- ☐ Tell them their new member number
- ☐ Check them in if they're going straight through

■ Closing down

- ☐ Open **Finances** and set it to **Today**
- ☐ Check the total against the cash
- ☐ Desk computer: send, and make sure nothing is left waiting
- ☐ Sign out

■ The six things to remember

RULE	WHY
Both boxes must be green for Entry allowed	Membership and equipment are counted separately.
Checking in only needs membership	Equipment can be red and you can still check them in.
Equipment starts at the next check-in	That's what Pending means. Don't charge twice.
One check-in per member per day	The button goes grey until tomorrow.
Payments and check-ins can't be undone	Check the person and the plan before you confirm.
No internet is fine — unsent work is invisible to your owner	Send before you hand over.

GymOS — Front Desk Guide. Keep this by the desk. Anything not covered here, or anything that doesn't match what you see on screen, goes to your gym owner.
